School of Education

Research Program Mission Statement

The mission of the Research Program is to cultivate educator-scholars by providing graduate-level instruction and mentorship in writing, evaluating scholarly literature, collecting and analyzing data, and developing evidence-based recommendations. The Research Program promotes social justice, academic integrity, critical thinking, and effective communication.

Textbooks Required

Course Description

Designed to introduce quantitative and qualitative research designs, methods, and data analysis techniques in education. Topics include ethical issues in research, construction and evaluation of measurement tools, critical analysis of research methods, use and interpretation of descriptive and inferential statistics, and analysis and synthesis of qualitative data.
### Major Learning Outcomes

By the end of this course, you will be able to:

1. Describe the values, assumptions, and process of action research.
2. Formulate educational research questions and hypotheses.
3. Create a survey that reflects considerations of sampling, reliability, and validity.
4. Apply various action research designs to typical educational research questions.
5. Analyze quantitative and qualitative data with the appropriate techniques.
6. Develop an action research plan to answer a research question of interest.

### Evaluating the Course: IDEA Course Objectives

The research program and your instructor greatly value feedback. In addition to providing informal feedback throughout the course, you are strongly encouraged to complete the end-of-course evaluation. This is one of the main ways we have to assess the quality of the course (and the instructor) and make improvements. The University of St. Thomas uses IDEA Center's evaluation. As part of this evaluation, you will be asked to rate how effective the course and the instructor were for helping you achieve the following objectives.

**Please be thoughtful in your evaluation and provide suggestions for improvement.** We strive for a 100% response rate, with reliable and valid responses!

- IDEA #3: Learning to apply course material (to improve thinking, problem solving, and decisions).
- IDEA #9: Learning how to find and use resources for answering questions or solving problems.
- IDEA #10: Developing a clearer understanding of, and commitment to, personal values.
- IDEA #12: Acquiring an interest in learning more by asking questions and seeking answers.

### Professional Association Standards Guiding this Course

The course objectives and outcomes of both research courses (EDUC/COUN 6326 and 6327) are consistent with the American Educational Research Association’s “Standards for Reporting on Empirical Social Science Research in AERA Publications” (AERA, 2006). The following areas are covered in the two-course research sequence and conform to AERA’s expectations.

1. Problem Formulation
2. Design and Logic
3. Sources of Evidence
4. Measurement and Classification
5. Analysis and Interpretation
6. Generalization
7. Ethics in Reporting
8. Title, Abstract, and Headings

### Social Justice Tenets Guiding this Course
The content and goals of this course are consistent with three tenets of Catholic social justice teaching that inform the School of Education programs.

- **Subsidiarity**: Educational institutions should be organized and governed as much as possible by the community being served; education should only be controlled at higher levels of society when it cannot be done effectively locally.
- **Dignity and rights of children**: Children possess full human dignity and are bearers of rights which should be recognized and upheld in educational processes.
- **People have a right to an education**: All people have a responsibility, for the good of society, to contribute to and foster education.

The Research Program encourages high-quality educational research that can help to improve the education—and thus the lives—of all people, particularly those who are disadvantaged, traditionally underserved, and at-risk. The Catholic social justice tenet *putting the needs of the poor and vulnerable first* underscores the importance of educational research that promotes the elimination of poverty and discrimination.

---

**Major assignments, due dates, and percentages of course grade**

Students must earn a letter grade of **B- or better** to receive credit for this Core class.

1. **Written Assignments: 65% of grade**

   This course is designed to be a practical, hands-on introduction to issues related to action research, data collection, data analysis, and interpretation of findings. The major assignments will assess your ability to apply research skills to an educational topic that you are interested in as well as your ability to make sense of others’ research.

   1. Survey construction, data collection, and data summary (15%) – due 11/1
   2. Partner interview and mini case study (10%) – due 11/12
   3. Dataset assignment: Application of research questions, hypotheses, and quantitative data analysis techniques to existing dataset (5%) – due 11/29
   4. Research plan and self-reflection (20%) – due 12/16
   5. Facilitated discussion (15%) – due 12/3

Details about each assignment are provided below, after the Course Schedule.

Assignments must be submitted to the instructor in Blackboard on the due date. **Please name the file Lastname_Firstname_survey** (for the survey assignment), **Lastname_Firstname_dataset1** (for the first dataset assignment), etc. It is your responsibility to ensure that the instructor receives your documents. Five points per day will be deducted from any assignment turned in late. In addition, failure to complete a major assignment will result in a zero for the assignment grade and a one-half
grade decrease of your final grade (e.g., if your final grade was a B, you would receive a B-).

All work must be written in APA style, using MS Word. Font must be Times New Roman, 12-point, and double-spaced, and margins must be 1-inch. Additional information will be provided in class and on Blackboard about the format and style of each assignment.

II. Participation and discussion: 35% of grade

Participation is defined as active contribution to class discussions and group activities, completion of Discussion Boards, and completion of Journal assignments (details provided below). You are expected to attend all sessions and participate in all activities in a professional manner. Any unprofessional behavior will result in zero credit for this portion of the grade.

If you miss one class period, one Discussion Board, or one Journal entry, you must meet with the instructor to discuss a plan for preventing future absences. Furthermore, if you miss a class, Discussion Board, or Journal entry, you will not receive participation credit for the missed session or assignment, regardless of the reason for absence or non-participation. Please keep the instructor informed of any emergency circumstances before an absence occurs so that alternative plans can be arranged. More than one absence or missed assignment may result in administrative withdrawal from the class.

You are expected to be punctual. More than one late attendance to class or will result in zero credit for participation for that session.

Participation activities and percentage of overall course grade

1. Journal entry 1 (5%) – due 10/18
2. Journal entry 2 (5%) – due 11/5
3. Journal entry 3 (5%) – due 11/19
4. In-class participation (20%)

**Student Accommodations**

In accordance with Section 504 of the Federal Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990, the instructor will make all possible and reasonable adjustments in policies, practices, services, and facilities to ensure equal and optimal educational programs and activities. Whenever a special accommodation is necessary to ensure access to full participation by students with disabilities, the student must inform the instructor of any disability or needed accommodations.

The University Office for ADA Compliance may ask to seek proof of disability and specify accommodations as requested by students. Students with special needs should inform the instructor within the first two weeks of class. Students must also contact the Office of Counseling and Disability Services (2nd floor of Crooker Center) by calling Dr. Rose Signorello at 713-525-3162 or Ms. Debbie Jones at 713-525-6953; the Office is open 8-5 Monday through Friday.

The accommodations will become official when the instructor receives official, written notification from the officer in charge of ADA compliance. Students should contact the instructor immediately if new needs arise. Students can see the instructor before or after class or request another time to discuss any matters. All information will be confidential.

<table>
<thead>
<tr>
<th>Professional Standards of Behavior for Students and Faculty</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Academic integrity</strong></td>
</tr>
<tr>
<td>Master's-level students in the School of Education demonstrate integrity in all of their activities, both personal and professional. Any unprofessional behavior or failure to adhere to the honor system is a serious violation of integrity and may result in failure of the course.</td>
</tr>
</tbody>
</table>

**Plagiarism** involves taking credit for another person's work. You must cite sources in APA style any time source material (e.g., books, journal articles, internet material, etc.) has been used, paraphrased, or quoted. Quoted material must be placed in quotation marks and referenced appropriately. Please note that copying information directly from a source without giving credit, using friends’ work, buying papers online, re-using one’s own work from previous classes, etc., all constitute plagiarism.

Any instance of plagiarism will result in failure of the course and may result in
dismissal from UST. Ignorance is no excuse; if you remain uncertain about the guidelines for using and citing source material after these issues are addressed in class, you should seek input from the instructor.

<table>
<thead>
<tr>
<th><strong>Technology Requirements and Guidelines</strong></th>
</tr>
</thead>
</table>

This course relies heavily on Blackboard 9, which is best viewed in the Firefox or Chrome browser. (A free download can be obtained at [www.firefox.com](http://www.firefox.com) or [www.google.com/chrome](http://www.google.com/chrome).) Please familiarize yourself with Blackboard through the tutorial (in the Start Here! menu).

Cell phones and other electronic devices must be turned off during class. If you need to take a call because of an emergency, should alert the instructor before class, keep the phone on vibrate, and step out to take the call.

Laptops are permitted for note-taking. Use of laptops for any other reason (e.g., email, chatting, surfing the web) will result in zero credit for the participation portion of the grade.

<table>
<thead>
<tr>
<th><strong>Use of UST email accounts</strong></th>
</tr>
</thead>
</table>

You are encouraged to use your UST email account. The instructor may send messages to through BlackBoard, which uses your UST address. If you have linked your UST account to another account, be sure to periodically clean out your UST mailbox so that it doesn't become overloaded (which can prevent you from receiving new emails).

<table>
<thead>
<tr>
<th><strong>Instructor availability</strong></th>
</tr>
</thead>
</table>

The instructor will be available for consultation during office hours and during scheduled appointments. It is strongly recommended you not wait until too late in the course before seeking guidance. Please come prepared with questions so that the consultation time can be spent effectively.

<table>
<thead>
<tr>
<th><strong>Language diversity</strong></th>
</tr>
</thead>
</table>

The University of St. Thomas values the ability to speak more than one language. The Master’s programs at UST are especially sensitive to issues of language diversity. The instructor is available to meet with you if you need help with written
English. In addition, computer support is available if you need additional review of English fundamentals.

C = In-class sessions; A = At-home modules/assignments

*The instructor reserves the right to make changes to this syllabus during the semester. Please check Blackboard on a regular basis for updated information, announcements, and handouts.*
Description of Assignments

I. General information: All assignments must be labeled (on the first line of text) with a title, your name, and the date on which it was submitted (see example). Citations and references, when used, should be in APA style. Please use Times New Roman 12 point font, double-spaced text, and 1-inch margins.

II. Major Assignments (65% of grade)

1. Survey construction, data collection, and summary (15% of grade):

   - You will create a brief (10-15) item survey on an educational topic of interest to you. The survey must include at least one quantitative (numeric) item and at least one qualitative (open-ended) item.

   - You will then give the survey to at least five people you know outside of class (e.g., friends, family members, colleagues) and to at least five classmates. Note: Your professor will facilitate data collection among classmates so that this will go smoothly and swiftly.

   - Using techniques you learn in class, you will organize this information in a spreadsheet and select two techniques for summarizing the data (e.g., mean and standard deviation for quantitative items; summary of themes for qualitative items).

   - You will then apply these techniques to the dataset and present the results. Results should include a one-paragraph summary of the findings and a table or figure depicting some aspect of the quantitative or qualitative data.

   - You will submit the survey, the spreadsheet, and the summary (as three separate files) in Blackboard.

2. Partner interview and case study (10% of grade): You will choose a partner from your group and identify 4-5 questions that you would like to ask him/her related to your research topic. You will then conduct the interview (by phone, webconference, or email, or in person) and write a 1-2 page summary of your findings. It is recommended that you think of a few questions that are related to your research topic, but keep in mind that not all people will have experience with all topics. Be sure to keep your research questions flexible.

3. Dataset assignment – Research questions, hypotheses, and data analysis techniques (5% of grade): You will receive a dataset from your professor that includes several variables. Using this dataset, identify two possible research questions. For each question, formulate a hypothesis about how the results will turn out. Then use the appropriate data analysis technique to determine whether your hypothesis is supported or not. Use the following format when submitting this assignment (note that the actual content of these will depend on the variables and questions selected):

   Example:

   Research question: Do fifth grade girls and boys differ on their end-of-year math test scores?
**Research hypothesis:** Fifth grade girls’ mean end-of-year math test scores will be higher than fifth grade boys’ mean end-of-year math test scores.

**Data analysis:** A $t$ test comparing the mean end-of-year math test scores for fifth grade girls ($N = 50, M = 85.5, SD = 5.8$) and boys ($N = 39, M = 73.2, SD = 8.1$) was significant: $t(87) = 8.34, p < .001$. Thus, the hypothesis was supported, as the girls’ mean score was significantly higher than the boys’ mean score.

4. **Facilitated discussion (15% of grade):** Each student will conduct a facilitated discussion. You should prepare copies (1 per student in the class) of a brief (1-2 paragraphs) overview of your research question and research plan. Prepare 2-3 questions for the group that will stimulate discussion. For example:

- Is this a topic you have encountered in your own work?
- What do you think the findings of this study would be, and why?
- How would you strengthen the design?

(Note: You do not have to use these questions; you are encouraged to develop your own as you see fit.)

5. **Research plan and self-reflection (20% of grade):** After selecting an educational topic of interest (which can be the same topic that you wrote about in 6326 or a new topic), you will create a brief research plan describing a practical research study that you could conduct in the future. (Note: You will not conduct the study as part of this class.) The plan may involve primarily quantitative methods, primarily qualitative methods, or both. Furthermore, you may choose to propose an action research project (in which you are an active participant and a major focus of observation) or a traditional research project. The plan should be 5-7 pages (not including cover page and references) and will include the following:

- **Brief literature review (3-4 pages):** Introduce your topic and synthesize the findings of four or more peer-reviewed journal articles on this topic. You may use the same articles that you used in the annotated bibliography that you wrote in 6326, if you are examining the same topic. End this section with a **statement of the research question or hypothesis**.

- **Description of method (2-3 pages):** Present your plan for collecting data. You should include paragraphs that answer the following questions (with APA Level 2 headings for each paragraph):
  - **Participants:** Who would participate in your study?
  - **Measures:** What questionnaires, tests, interview questions, or other instruments would you use to collect data? Be sure to explain how you would improve the reliability and validity of these methods.
  - **Design and Procedure:** What type of research design would you use, and what steps would you take to collect data?
• **Data analysis:** What data analysis techniques would you use to make sense of your data?

• Note that, in addition to submitting the research plan, you should include a **2-3-page self-reflection on how the plan reflects your growth as an action researcher.** The self-reflection will constitute 5% of your grade, and the research plan will constitute 15%. Please upload both documents separately in your e-portfolio (developed in EDUC/COUN 6326) and submit the link to your e-portfolio in Blackboard.

III. Participation Assignments (35% of grade)

1. **Journal entries (15% of grade):** You will complete three journal entries that involve self-reflection about action research, social justice, and your own work. These will be shared with the professor, who will grade them in terms of completeness, organization, and writing. The goal of these journal assignments is to encourage you to think about how various action research concepts might be useful in your day-to-day work, and to reflect on how action research can be used to promote social justice. Journal entries should be a minimum of three paragraphs. Journals will only be seen by you and the instructor.

2. **In-class participation (20% of grade):** You are expected to participate actively in class and group discussions.
