Course Objectives: Vectors and the geometry of space, vector functions, partial derivatives, multiple integrals, Greens Theorem, curl and divergence, Stokes Theorem, The Divergence Theorem.

Course Structure:

Homework
Will be assigned regularly. Designed to give the students an opportunity to practice concepts covered during lectures. Not to be turned in.

Quizzes
Will be given every Thursday at the end of class to see how well the students have learned the recently covered materials. Each Quiz includes 2-4 problems that are very similar to the problems from the Homework that was assigned the previous week.

Exams (3 total)
These are designed to give the students an opportunity to demonstrate the skills and knowledge they have obtained and their mastery over the new concepts. The problems on the Exams are very similar to those on the Homework and the Quizzes.

Final Exam
Comprehensive. Given at the end of the semester to give the students a chance to demonstrate the skills and knowledge they have obtained throughout the semester. The problems on the Final Exam are very similar to those on the Exams, Quizzes, and the Homework.

Make-ups
No make-ups allowed. If you are late, you will not receive extra time. Any exceptions, university and/or emergency-related situations will be handled on a case-by-case basis. If you missed an exam or the final, you must contact the instructor within 24 hours.

Grading
Your grade will be calculated based on the following percentages:

Quizzes: 10%
Exams (3): 60% (20% each)
Final Exam: 30%

Your letter grades will be determined based on the following scale:
